TABLE OF CONTENTS

1.0 Introduction 1

2.0 Stormwater Sampling 1

3.0 Minimum Control Measures 1

Appendix A Results of Stormwater Sampling

Appendix B Guideline for Municipal Management Practices for Street Sweepings and Catch Basin Cleanings

1.0 INTRODUCTION

This report has been prepared by Milone & MacBroom, Inc. (MMI) for the Town of Redding as the required Annual Report described in Section 6(i)(2) of the General Permit for the Discharge of Stormwater from Municipal Separate Storm Sewer Systems (the Permit). The town developed a Stormwater Management Plan in association with its registration under this permit and has developed and submitted Annual Reports for 2004, 2005, and 2006. This report is intended to address stormwater-related activities performed within the town during the 2007 calendar year.

2.0 STORMWATER SAMPLING

Stormwater samples were collected at six locations in town on July 23, 2007. The results of these analyses are presented in Appendix A.

3.0 MINIMUM CONTROL MEASURES

The tables on the following pages represent the minimum control measures developed by the Town of Redding in previously developed documents entitled:

1. "Stormwater Management Plan Town of Redding CT" prepared February 5, 2007 and revised July 1, 2007; and
2. "2006 Stormwater Annual Report" (undated).

The current status of each minimum control measure is also provided. Please note that activities in previous reports were numbered differently (e.g., Development of Stormwater-Related Web Page is BMP 1-1 in the town's 2006 Stormwater Annual Report and 1.2 in the Stormwater Management Plan). This document is intended to be a compilation and reconciliation of those previous reports.

**Public Education and Outreach Plan
Town of Redding Stormwater Management Plan
2007 Annual Report**

Best Management Practice	Measurable Goals	Responsible Party	Year of Implementation	
			2007	2008
