The COVID-19 vax clinic scheduled for Saturday January 29 has been CANCELLED due to the impending weather.

Availability at local pharmacies for COVID-19 vaccination appointments have opened up considerably. Next day appointments can be obtained by going to https://www.vaccines.gov/.

Where to Get Tested

Pat Waldren Center, 23 Memorial Drive, Danbury, CT Danbury M-F 3-7pm Sat/Sun 9am-3pm
99 Calf Pasture Beach Rd. Norwalk M-F 2-7pm Sat/Sun 9-1pm
Cove Park 1125 Cove Rd. Stamford M-F 2-7pm Sat/Sun 10am-3pm
Yale COVID test sites: Doctor must prescribe test, appointment required https://www.vnhrs.org/patient-care/covid-19/testing/testing-locations
Hartford HealthCare COVID test sites: Appointment required https://hartfordhealthcare.org/health-wellness/coronavirus/testing

N95 Masks Available

N95’s are available at various locations around Redding such as Town Hall (call 203-938-2559 from the front door), the Mark Twain Library, Transfer Station, Park & Rec, Heritage Center, and houses of worship. An N95 mask is a respiratory protective mask designed to form a seal around the nose and mouth. N95’s are not designed for children or people with facial hair because a proper facial fit cannot
be achieved to provide protection. Individuals with respiratory, cardiovascular, or other underlying risk factors who find N95’s difficult to wear for long periods of time should not use them and find an alternate mask that is more comfortable to wear.

At-Home Test Kit Availability

Free home-test kits are available through a government website https://www.covidtests.gov/. Orders are limited to four per residential address. Tests will ship within 7-12 days of ordering (no shipping charge) and the timeline is expected to shorten as the program gets up and running. Many have commented on the ease of signing up.

At-home test kits can also be found at local pharmacies (supplies limited) and online at big box stores.
