The Commission started its inspection by driving over a long driveway to the house site. Construction materials and equipment line portions of the driveway. The house site outline had been painted on the ground. The house site is on a high point overlooking the pond and is outside the regulated area, but will need S&E controls to protect the lower pond from the uphill construction. Additional construction materials and equipment are located on the house site.

The site inspection ended at 4:30 pm.
